

Sealing of gas appliances

Appliance :

Non-conforming because :

This appliance has been sealed as a safety measure following a brief examination of the visible and directly accessible part of the installation and outside any legal obligation. This does not under any circumstances indicate that the sealed appliance conforms to the applicable safety regulations on all other points or that the other appliances/the rest of the installation conform/s to the applicable safety regulations.

Sibelga strongly recommends that the removal of the seal on the above appliance be carried out by a qualified installer (preferably CERGA) after a full check and work to ensure the installation and appliances conform to regulations.
